KEMENTERIAN PENGANGKUTAN

YB Loke Siew Fook
Minister of Transport

MINISTER OF TRANSPORT'S WELCOME NOTE FOR THE MALAYSIA COMMERCIAL VEHICLE EXPO 2024

Salam Sejahtera and Salam Malaysia Madani,

Welcome to the sixth edition of the Malaysia Commercial Vehicle Expo (MCVE).

The MCVE ties in with the Transport Ministry's vision for an integrated, efficient and safe transportation system.

Emerging from the Covid-19 pandemic, it is timely to renew our commitment to the transport industry that is critical to keeping our economy moving.

This year, we see the transition to electric trucks and buses starting to gain traction. As we stand on the threshold of a new transportation era, characterized by the shift towards sustainable drive-trains, we are thrilled to witness the unity of our industry at this home-grown exhibition.

While we shift to more sustainable hardware, software is equally essential to improve efficiency. As transport minister, we are committed to the digital transformation.

In Nov 2023, the Commercial Vehicle Licensing System (iSPKP) was launched to provide an end-to-end online licensing platform for the issuance of licenses and vehicle permits.

Integrated with the database from more than 10 agencies, iSPKP aimed to halve processing time.

This exemplifies the determination of the Madani Government's commitment to enhance public service delivery through digitalization.

For years, Asian Trucker has been instrumental in fostering connections among stakeholders. And now, for the sixth time, the Malaysia Commercial Vehicle Exhibition once again showcases the latest offerings in the market.

This event serves as a vital platform for industry players to stay abreast of developments that will shape their future endeavors.

The emergence of electrified transport and e-commerce necessitates a reevaluation of processes, legislation, and work methodologies. Embracing new technologies is imperative for maintaining competitiveness.

We hope that the exhibits and showcases at MCVE 2024 will invigorate your operations and enhance your businesses. I hope to witness these innovations on the roads.

On behalf of the Ministry of Transport and my esteemed colleagues, I extend our warmest wishes for a successful visit to the Malaysia Commercial Vehicle Expo 2024.

We also welcome your feedback on how we can collectively enhance our local transportation system and network.

Thank you.
YB Loke Siew Fook
Minister of Transport

ASIAN TRUCKER WELCOMES YOU TO THE MALAYSIA COMMERCIAL VEHICLE EXPO 2024

Dear Ladies and Gentlemen,

Welcome to the sixth instalment of the region's largest commercial vehicle exhibition, organised by Asian Trucker. We return to the original format, no longer being restricted by the measures taken to address the pandemic. Known as MCVE, this exhibition has always prided itself as being a platform to showcase the latest developments in the commercial vehicle industry. This is no different this year as we see an emphasis on the transition to new, electrified powertrains. Not only marks MCVE the beginning of a new era post pandemic, but also one that brings new opportunities through the use of innovative propulsion systems. As we welcome you as delegates, we hope that you find this event beneficial as an avenue to learn all about the new chapter in modern transportation.

This time again, many of our long-time supporters of MCVE have returned. A wide range of brands have decided to be part of this event, making it a representation of the entire ecosystem that forms the transportation industry. Oftentimes, we are labelled as operating in a niche industry. This, however, could not be further from the truth. Looking at what is being reported in the media, it becomes clear that the transport industry, directly and through the involvement of many other businesses needed to operate and improve it, is indeed a major contributor to the economy. The push towards electric propulsion systems alone gives way to opportunities to create new services and products, new thinking and new ways of doing business. It is at MCVE 2024 that the energy transition will be presented, marking the event as a turning point.

Being able to reinstate our fringe programme has given rise to some very exciting sub-events. In particular, we are elated to be hosting the Asian Trucker Networking night again. This time, it is supported by Hengst to make it an even more memorable evening. Adding flavour to the show is Mr Coffee, who will join Hengst as the R&R sponsor to offer artisanal brews while Safe Truck enables us to carry the information we gather during MCVE thanks to their goodie bags. Our Official Lubricant Partner is PETRONAS, which will keep the industry lubricated with their comeback to the expo. Taking the centre stage, MAN Truck & Bus Malaysia as the Gold Sponsor is taking centre stage this year, cementing their leadership in EURO V engine technology. Each of these sponsors have added layers to our fringe programme and we encourage you to visit their respective booths to see what they have in store for you.

To all delegates we say thanks for your visit; we appreciate the support of exhibitors and supporting organisations without whom, this event would not have been possible. It is our hope that you will enjoy the exhibition. As we celebrate the industry, we wish you have a successful time at the Malaysia Commercial Vehicle Industry.

Stefan Pertz
 Editor in Chief, Asian Trucker, Asian Buses
 Organiser, Malaysia Commercial Vehicle Exhibition 2024

NEXT STOP: ASIA-PACIFIC

As independent shipping agency specialized in Roll-On/Roll-Off and BreakBulk services with selected ocean carriers – and as general agent for Bahri Line in Northern Europe and Scandinavia – we can offer a wide range of cargo services, from cars and commercial vehicles, construction materials, various IMO Classes, mining and agriculture machinery to various breakbulk products and containers.

Our comprehensive knowledge, skills and expertise when things get really tough will always be of your benefit for your shipments. With our trades you can reach your growth markets even better and faster.

We look forward to seeing you at the Malaysia Commercial Vehicle Expo 2024. Come and visit us for a chat, discussion or just to say hello at stand B06. We will be there to assist you with any booking inquiries.

LET'S TALK TO DISCOVER NEW
OPPORTUNITIES FOR YOUR
CARGO SHIPMENTS!

Asian Trucker Media provides a full range of communications channels for the commercial vehicle industry. Our platforms are aimed primarily at fleet operators and driver-owners in South East Asia.

Our print magazines, Asian Trucker and Asian Buses, are premier business and product magazines and feature issues concerning drivers through to logistics and infrastructure executives. We publish three editions: Malaysia (Eng), Thailand (Thai) and Asian Buses (Eng). In addition, we host seminars, publish E-Newsletters, provide advertising possibilities via websites and organise and manage Southeast Asia's largest commercial vehicle exhibition. Our accolades include these awards MPAS Editor of the Year (Gold), MPAS Trade Media of the Year (Bronze), MPAS Front Cover of the Year, Best Print Report of the Year, and APAC Insider Trucking Publication of the Year.

Asian Trucker Malaysia has been published since 2009. In December we will celebrate 80 issues of the Malaysian Trucker magazine. Our Thailand office has been active for over ten years. To round things out, we produce special editions on selected topics. Addressing the needs of this market, we added the Bus magazine in 2014 which we

have published almost 40 times. Initially, this publication was called "Asian Trucker Bus Special". However, in January 2015, we have renamed it to make it a stand-alone publication. Also added in 2014 was the Asian Trucker Drivers Club, which is a non-for-profit component of our business. Here we seek to enhance the skills and the social standing of truck drivers. This initiative is funded mainly through sponsorships and has seen several hundred drivers join in the first year of its existence.

Asian Trucker Malaysia is an independent company, established in Malaysia and being the holding company for Asian Trucker Media, Asian Trucker Exhibition and Asian Trucker Thailand. Asian Trucker is the only regional and cross-country magazine of this kind. Many companies keep complete collections of the magazine as reference libraries. Our exhibition, MCVE, is currently the largest exhibition in Southeast Asia dedicated to the commercial vehicle industry and the 2024 instalment it is going to be the sixth time we are hosting the event.

Introduction

Rogers Asia Malaysia is a professional provider of exhibition freight forwarding and exhibition onsite handling services, both on a local and global scale. Our network and expertise has been honed by more than 35 years of experience, specialising in shipping, customs clearance, transportation and onsite ancillary services, for the global exhibitions industry.

Since its interception in 1984, Rogers Asia Malaysia has been recognised as a global leader in the field of exhibition freight and transportation, providing complete shipping, onsite management and logistics services to organisers and exhibitors. In addition, Rogers Asia Malaysia was awarded by the International Exhibition Logistics Association (IELA) as the 2008 Best Domestic Agent, 2019 Best Onsite Agent and two times awarded to our staffs as the Best Student of IELA Winter Seminar in Zurich, Switzerland.

We provide full shipping information to exhibitors globally, offering specialised freight services through our network of offices and agents, right from your doorstep through the delivery process, to your stand. Customs clearance, inland transport, equipment handling and manpower are managed and controlled by our group of experience staff, from the commencement of the exhibition's tenancy date, throughout the exhibition period and to the final removal of the shipment, upon the conclusion of the exhibition; we will handle all your freight issues, so you can focus on your business goals.

List of Services

Our extensive experience in this field of exhibition freight provides the show organisers and exhibitors with timely, professional and worry-free coordinated movement of exhibition materials, from any overseas location to the show venue.

Our services include the following:

Providing Temporary Import Bond

Providing Local Shipping And Warehousing Facilities

Providing Customs Brokerage Service

Providing Onsite Labour And Equipment

Providing Complete Shipping Instructions According To Local Regulations

Man Helps Malaysian Transporters Power Ahead With Confidence

During these challenging times of having to manage rising costs on almost every front, one heavy commercial vehicle manufacturer has stepped up to help members of the transport industry in Malaysia power ahead with confidence.

In the past three years, German manufacturer, MAN Truck & Bus (M) Sdn Bhd (MAN Malaysia), has consistently demonstrated leadership. The company has introduced a comprehensive range of trucks and buses that are not only

technologically advanced, but offer a winning combination of power, reliability, fuel efficiency and sustainability to help fleet owners achieve profitability.

It has also significantly strengthened its Peninsular-wide network with strategically located full-fledged branches in Shah Alam, Port Klang, Prai and Johor Bahru to deliver world-class aftersales support to fleet owners. Plans are afoot to expand the network to the East Coast in the near future.

Keenly aware that costs are of the utmost concern of any transport company in a business environment where margins are razor-thin, MAN Malaysia has ensured that their MAN Genuine Parts are competitively priced, always available and come with a two-year warranty to optimise the uptime of every MAN Truck. For the many older MAN Trucks that are still plying Malaysian roads, the company has introduced high-quality remanufactured MAN Genuine Parts Ecoline that offer up to 40% savings without compromising on performance.

ALWAYS LEADING FROM THE FRONT
Befitting a global brand with a strong heritage and a presence in Malaysia that has spanned more than three

decades, MAN Malaysia has always seized the initiative and taken the lead when it mattered most.

With sustainability in mind way before it became a buzzword, MAN Trucks were already B100-ready since 2018. Although 100% biodiesel remains mostly unavailable in the Malaysian market to this day, there are close to 4,000 MAN Trucks that are running on this FAME fuel all over the world.

In Europe, MAN's belief that the future of truck drive technology is electric has seen MAN's heavy eTrucks enter series production this year. Award-winning MAN eBuses are already driving emission-free urban public transportation all across the continent.

In 2021, MAN was the first heavy commercial vehicle manufacturer in Malaysia to introduce low-emission EURO V engines as standard across its entire truck range. It was a bold effort to help the local trucking industry reduce its carbon footprint.

Compared to a EURO III specification truck, MAN EURO V Trucks are estimated to consume less fuel and emit up to 22% less CO₂ and 64% less NO_x greenhouse gases based on an annual mileage of 120,000 km.

The new MAN EURO V Trucks have proven themselves on the road, offering superior reliability and uptime, fuel efficiency and lower total costs of ownership. Far-sighted owners who invested in them were getting more business from ESG-conscious customers and higher revenue while enjoying lower maintenance costs and significant fuel savings. Their drivers were happy with the superior comfort, proven power and high-tech safety features. Unlike other marques, locally-assembled MAN Trucks with are specified with many state-of-the-art safety features as standard, not options. These included advanced driver assistance systems (ADAS) like Lane Guard System (LGS), Brake Assist (BA), Anti-lock Braking System (ABS), Electronic Braking System (EBS) and driver's airbag.

At the end of 2023, MAN Malaysia announced that its proven bus chassis would also come with EURO V engines as standard. Major bus operators have been signing up for the low-emission MAN Bus chassis knowing that MAN's EURO V specification engines have been proven on Malaysian roads and operating conditions. Aside from its low carbon footprint, MAN Bus chassis also offer unmatched levels of comfort and safety.

A BRAND ON THE ASCENDANCY

The decision to introduce EURO V-powered MAN Trucks more than a year ahead of competitors was a game-changer for the MAN brand in Malaysia. Coupled with the relocation of the company's headquarters from Rawang to an integrated facility in Shah Alam in 2023, the brand has enjoyed a renaissance that has not let up since. The MAN Shah Alam facility houses the Malaysian sales and aftersales operations, CKD assembly plant, a training centre and Australasia regional operations.

As a leading global manufacturer with a rich heritage built on innovations, MAN has much to contribute to help modernise the country's transport industry. The company has valuable insights into the latest technologies, trends, regulations and laws through our global network. That is why MAN is proactively engaging with and support many transport associations all over Malaysia and working closely with the relevant Government authorities to try to drive positive change.

MAN Malaysia is a wholly-owned subsidiary of MAN SE. For more information about MAN in Malaysia, visit www.man.com.my.

PETRONAS Lubricants International joins MCVE as the Official Lubricant Partner for 2024

PETRONAS Lubricants International (PLI) is the global manufacturing and marketing arm of PETRONAS, Malaysia's dynamic global energy group. Established in 2008, PLI has quickly become a leading lubricants company globally, operating in over 100 international markets with offices in key locations like Kuala Lumpur, Turin, Belo Horizonte, Beijing, and Chicago.

PLI is a progressive energy and solutions partner, enriching lives for a sustainable future. PLI's commitment remains to conduct and grow its business in ways that contribute positively to society and the environment.

PLI powerbrands include PETRONAS Syntium and PETRONAS Syntium Hybrid for passenger cars, PETRONAS Sprinta for two-wheelers, PETRONAS Urania for commercial and industrial vehicles, PETRONAS Iona for electrified powertrains, and PETRONAS Tutela as functional fluid range. For industrial partners, PETRONAS Industrial Solutions offers specialised products and services to support business growth across industries. From industrial lubricants to customised solutions for electric vehicles and commercial sectors, PLI's offerings are tailored to meet specific demands.

For this year's Malaysia Commercial Vehicle Expo (MCVE), PLI proudly showcases PETRONAS Urania, an exclusive line of lubricants crafted for trucks, buses and commercial vehicles. Stay stronger for longer with PETRONAS Urania, a suite of heavy-duty diesel engine oils renowned for its exceptional performance and protective

properties. Powered by StrongTech™ technology, these lubricants ensure business efficiency with prolonged durability, optimising vehicle availability, reducing maintenance costs, curbing fuel consumption, and enhancing overall driver experience. PETRONAS Urania embodies core strength, enabling fleets to operate at peak efficiency, improve profitability, and continue advancing with confidence.

In the realm of motorsports, PLI serves as the technical resource behind PETRONAS' championship-winning partnership with the Mercedes-AMG PETRONAS Formula One Team. Responsible for the design, development, and delivery of Fluid Technology Solutions™, which encompasses customised lubricants, fuels, and transmission fluids, PLI plays a pivotal role in powering the Silver Arrows to victory on the racetrack.

PLI's vision is characterised by aggressive business growth strategies, positioning the company as a leading player in the global lubricants sector. Its commitment to excellence, sustainability, and technological innovation makes PETRONAS Lubricants International a trusted partner in driving progress and success across diverse industries.

Hengst Filtration

Hengst Filtration is a family company founded in 1958 in Münster, Westphalia. With more than 3 500 employees at 23 locations worldwide, it develops innovative solutions in filtration and fluid management.

We supply technologically leading filtration systems in the areas of plant and mechanical engineering, industrial filtration, hydraulics, life science and health care. The tailor-made solutions are used in medical clean rooms, air conditioning systems, cleaning devices, industrial plants, power tools and robots. We are also a series supplier to the international vehicle and engine industry and a development partner for sustainable drive and mobility concepts.

“As a family business, we assume responsibility for the careful use of resources. - Jens Röttgering, Owner and Chairman of the Administrative Board

In this way, Hengst Filtration makes future-oriented technologies possible in all sectors worldwide.

Our vision: Purifying our Planet

Mobility, health, technology, environmental protection & sustainability - we work every day on the major issues of our time. And with the goal of making the planet a cleaner place.

Millions of our products help to clean up the world. But it can be even better. We think filtration - in everything we do.

The way we think and act as a family business is shaped by our responsibility to use resources sparingly and by the challenge of making engines, machines and systems cleaner and more efficient with forward-looking filtration solutions, thereby improving our living environment in the long term.

As a company, we not only convince with innovative technology, but also through trusting and partnership-based cooperation with our customers all over the world. In addition, we want to offer all our employees a safe, sustainable and meaningful job.

The Hengst Brand

The Hengst brand has stood for top quality in filtration for 65 years. Initially as “H filters for oil, fuel and air”, we have been developing and manufacturing filtration and fluid management solutions for well-known automobile and engine manufacturers since the very beginning. In the meantime, Hengst has become a recognized brand for many areas of application in industry - also in industrial air filtration, for small devices or medical technology.

Hengst develops innovative solutions for well-known manufacturers and therefore also stands for original equipment manufacturer quality in the service parts sector. So you can rely on Hengst solutions for the entire product life.

HRD CORP

Jalan Beringin, Damansara Height,
50490 Kuala Lumpur, Malaysia.

Tel: 03-20964600 (office)

Contact: Mr. Khairizal Othman / Mr. Aidie Ramlan

Email: mohdkhairizal@hrdcorp.gov.my

Website: <https://hrdcorp.gov.my/>

Human Resource Development Corporation (HRD Corp) was established in 1993 as the Human Resources Development Council. It was incorporated into Pembangunan Sumber Manusia Berhad through the enactment of the Pembangunan Sumber Manusia Berhad Act 2001.

As an agency under the Ministry of Human Resources, it is responsible for collecting levy from key industries and disbursing training grants to registered employers through its internal mechanisms known as the Human Resources Development Fund (HRDF).

In April 2021, HRDF became HRD Corp. The name change reflects its new responsibilities, directions and mission. These include expanding its workforce, upskilling and reskilling efforts to all Malaysian employers and individuals, and providing income-generating opportunities to all communities in need.

This transformation is in line with HRD Corp's ambition of driving Malaysia's talent development aspirations for the long term.

For more information, visit the HRD Corp website – www.hrdcorp.gov.my.

CAM is a Malaysian brand founded in 2009, which specialises in light commercial vehicles under R&A Marketing Sdn Bhd of Sendok Group. Our product line-up ranges from light truck, 10-18 seater van, 20-28 seater minibus, panel vans, special purpose vehicle such as ambulances, caravans etc. In the January of 2022, CAM launches the Malaysia's 1st Electric Van CAM EC35 and then CAM EA4, the EV Medium Van in 2023.

CAM has a wide aftersales network of >60 service centres with qualified technicians and adequate supply of spare parts, our 24/7 call centre also work around the clock to attend to emergency cases. 'Consistent', 'Active', and 'Mobile' are the core components embodied in CAM. We advance with consistency in our services as we actively fulfill customers' commercial logistic requirement using innovative products and solutions. At MCVE 2024, CAM will be launching the long awaited Kingo 6AT van with auto transmission and their upgraded Co-Star Minibus, the community transporter with 20 – 28 seater seating capacity.

To find out more about CAM, please visit www.cammalaysia.com.my or contact 019-2290390 / 03-3345 5600, or email us at info@sendokgroup.com.

TRUCKMART TRADING (M) SDN BHD

5, Jalan 12/32b, Tsi Busines Park, 52000 Kepong,
Kuala Lumpur, Malaysia.

Tel: +6010-7702222

Contact: MR JAZZ KONG

Email: jazz@truckmart.com.my

Website: www.truckmart.com.my

Truckmart was established on 18 March 1999. In the beginning, Truckmart only supplied Japanese truck parts to the market.

In early 2000, we decided to expand our range of products to cater to the growing Malaysian trucking market needs. We started supplying quality parts to consumers using European truck brands like Scania, Volvo, Daf & Man just to name a few.

In appreciation of our continuous effort and growing experience, we were appointed as dealers for several OE truck spare part suppliers like Mann-Filter, Knorr-Bremse, FTE, Kongsberg & Atmos in early 2000.

Knorr-Bremse appointed us to develop their 'Knorr-Bremse Truck Service' project in 2021. (Truckservices is Knorr-Bremse's pledge to supply vehicle owners, workshops and distributors with high quality products and service solutions for their commercial vehicles regardless of age.)

Over the years, Truckmart has expanded and grown from strength to strength. 'Truckmart – Always Ready for You' which started in Johor Bahru has now to two other sales offices to serve our customers better. In 2016 Truckmart partnered Hong Feng to set up office in Port Klang and in 2018 Truckmart Kuala Lumpur branch was set up. We are proud to say that we stand by our slogan 'Always Ready for You'.
